Antivirus Software

Have a good Antivirus software on your computer. This will help detect malicious software from infecting your computer. Once the antivirus software is installed, make sure that it stays on and is up to date. The following is taken from the article from PCMag.com "*The Best Antivirus Protection for 2023*" by Neil J. Rubenking updated December 6, 2023. The article has a lot of information on different antivirus software and compares the pros/cons of 10 different antivirus software solutions.

- ➢ Bitdefender
- ➢ Webroot
- ➢ Norton
- ➢ McAfee
- ➢ ESET NOD32 Antivirus
- ➢ And many more listed in the above article.
- ➢ The article has live links to their best antivirus software and a comparison of these antivirus software. Some have a free version as well.
