BRINGING R.O.S.E. TO YOUR COMMUNITY

Your questions, answered

How is our program different?

Our presentation is designed specifically to help older adults identify and avoid scams. We take the time to focus on topics and a delivery style that make it easy to learn what's needed to stay safe. Here are some of the topics we cover:

1

The Anatomy of a Scam

How criminals operate, so the warning signs are easy to spot.

2

Artificial Intelligence

What AI means for today's scams, in plain language.

3

Protection Tools

Resources, tips and tools to protect yourself and your loved ones.

How long is the presentation?

Sessions generally run 60–120 minutes, depending on the program and the number of questions from the audience.

What do we need to provide?

A screen or TV to connect our computer, and a microphone for larger rooms. We bring the rest.

How often should we host?

At least every six months to a year. Hearing the message regularly builds scam-prevention habits, a healthy skepticism or healthy curiosity, and we update our materials twice a year.

Why is there a fee?

As a nonprofit, a nominal fee helps cover the labor, travel, printing and materials for each session. Sponsors fund some sessions at no cost to the host — they go quickly, so ask early.
